

S SCALE MODEL RAILWAY SOCIETY PARTS LIST - AUGUST 2022

This list is an update of last years May 2021 list and reflects the increased prices agreed at the February 2022 AGM. There is also an order form that is used at SSMRS meetings. For e-mail orders, members can either use the form or list out the codes and quantities etc in their message.

Please email the Parts Officer with your order, either using the Order Form or setting out the codes and quantities etc.

The Parts Officer will email you the total cost including post and packing and Members can pay by cheque or online banking.

Certain items are highlighted in red, because they are new or need attention drawing to them. For example, I have moved the back to back gauges to the track and signal section.

Various notes are added in green.

1) Dave Provan card kits and etches are in the wagon section. 2) John Taylor etches on the last page are for locomotives and wagons that should be ordered direct from John.
